We, the undersigned, have evaluated your rubber compound formulations and plastic products listed above according to the requirements of the European Union Regulation 1935/2004(3)/EC. Materials intended to come in contact directly or indirectly with food must be sufficiently inert to preclude substances from being transferred to food in quantities large enough to endanger human health or bring about unacceptable change in composition of the food or deterioration in its properties excluding organoleptic testing. These rubber compounds and the ingredients therein and the DuPont plastic product information comply with these regulations.
